

Seonghyun Jin

KAIST AI, BISPL Lab jinotter3@kaist.ac.kr jinotter@gmail.com
jinotter3.github.io github.com/jinotter3 [Google Scholar](#) [LinkedIn](#)

Research Interests

Reconstructing and generating the real 3D world; streaming 3D reconstruction; geometric perception; latent state modeling; generative world modeling.

Education

KAIST, Graduate School of AI

Mar. 2025 – Present
Daejeon, Korea

Integrated M.S./Ph.D. student in Artificial Intelligence

- BISPL Lab, advised by [Prof. Jong Chul Ye](#).

Seoul National University

Mar. 2020 – Feb. 2025
Seoul, Korea

B.S. in Computer Science; B.A. in Economics, College of Liberal Studies

- GPA: 3.68 / 4.3. Graduated *Cum Laude*.

Research Experience

RUBIS Lab, Seoul National University

Sep. 2022 – Jun. 2024
Seoul, Korea

Undergraduate Research Intern

- Conducted undergraduate research in computer science at [RUBIS Lab](#).
- Prepared experiments, code, and literature reviews for research projects.

Publications

FILT3R: Latent State Adaptive Kalman Filter for Streaming 3D Reconstruction

Seonghyun Jin, Jong Chul Ye

arXiv:2603.18493, 2026

[Paper](#) [Code](#) [Project](#)

CRePE

Seonghyun Jin, collaborators

Preprint in preparation, 2026

arXiv link to be added after upload.

Languages

Korean Native

English Fluent; TEPS 538, TOEIC 980

Technical Skills

Programming Python, PyTorch, Git, $\text{\LaTeX}$

Research 3D reconstruction, computer vision, deep learning, experimental evaluation
